I aspire to be a moral leader and virtuous learner in the technological abode, letting myself to explore in the industrial and corporate domain & contributing professionally to the growth and success of the organization.

PROJECTS

Banking and Insurance Domain project

Python, Java, Spring boot, Ansible, TestNG, Terraform

- Implemented DevOps practices in banking and insurance projects, streamlining code delivery and automating workflows with Jenkins.
- This automation significantly improved the efficiency of code deployment, reducing human error and streamlining processes.
- By introducing containerization, ensured higher reliability and scalability, allowing teams to adapt to changing requirements quickly and enabling agile development and reducing deployment times.
- The integration of these DevOps tools contributed to a more agile development environment, accelerating the time-to-market for new features and enhancements while maintaining a robust and secure infrastructure.
